About me

I design B2B and B2C products in the information security space, where clarity, structure, and smooth user experience really matter.

I build interfaces with thoughtful user flows, intuitive logic, and a clean, polished look.

I work closely with PMs, developers, and analysts throughout the entire process, keeping things aligned and moving forward.

And I genuinely love what I do.

Tools

Languages

Russian - Naitive

English - B2 (Intermediate)

Education

UX Researcher
Google UX Design Nov 2025 – Feb 2026

UX/UI Designer
UPROCK SCHOOL Mar 2024 – Sep 2024

Master's in Information Security Analytics
ITMO University Sep 2020 – Jun 2022

Bachelor's in Computational Linguistics
SUAI Sep 2014 – Jun 2018

Experience

Product Designer AppSec Solutions
Sep 2024 – Mar 2026 · 1 yr 7 mos

Designed high-load systems and interfaces for B2B products in the information security domain (CRM systems, dashboards, admin panels, analytics tools)

Worked on end-to-end user experience: from user flows and wireframes to high-fidelity prototypes

Built and maintained a design system; worked with Storybook, contributed to migration to Taiga UI, and designed custom components

Collaborated closely with product managers, developers, and analysts at every stage of the process

Led redesign and UX improvements across a web application ecosystem: dashboards, forms, filters, tables, and other UI components

UX/UI designer Grokhotov studio
Jan 2023 – Dec 2024 · 2 yrs

Created wireframes, mockups, and interactive prototypes to communicate ideas to both the development team and stakeholders

Designed responsive interfaces; led redesigns and improved user journeys

Maintained and updated design systems and UI kits to ensure consistency across products

Conducted usability testing and gathered feedback to improve user experience and interface performance

Managed multiple projects simultaneously, balancing timelines and quality

Soft Skills

- Creativity
- Teamwork
- Strong communication skills
- Self-learning
- Positive mindset
- Ability to justify and defend decisions

I enjoy working in a team and thrive in collaborative environments

I'm passionate about self-learning — I continuously explore new trends, tools, and best practices, especially in emotional design

I'm a non-confrontational person and prefer resolving disagreements through open dialogue and thoughtful, well-reasoned arguments

Hard Skills

- UX / UI
- Design Thinking
- UX Research
- Usability Testing
- Interaction Design
- CJM

I apply Design Thinking to solve UX problems in a structured way — from empathy and ideation to prototyping and testing

I conduct UX research, including interviews, surveys, and analytics, to build personas and better understand user pain points

I organize usability testing with real users to validate and improve prototypes
